

What To Consider When Renewing Medical Insurance?

Auto-renew is the easy way out for most people year after year.

However, if you take the **time to review**: –

- You may get a **better deal** somewhere or
- To address your **changing needs**.

Some of the crucial things you need to think about: –

- What are your current **plan coverages**?
- How much it **costs** every year?
- What **other plans or policy providers** are offering?

You may eventually find out: –

- You are paying for **benefits that you do not really need** and;
- May want to switch to a **cheaper plan to save some cash**.

To renew or not?

- You can choose to continue with the renewal if you are completely satisfied, or
- Begin the **process of switching** health insurance policies if you think there is a better one for you out there.

If you are not sure whether you should renew or look elsewhere, you are welcome to contact us at **Dindings Corporate Insurance Agency (DCIA)**, and we could help to find one that suit/meet your needs.
